Work Experiences

UI/UX designer & Front-end Developer

May 2021 - Present

Ceymox

Create the user interface for an app, website, or other interactive media. Their work includes collaborating with product managers and engineers to gather requirements from users before designing ideas that can be communicated using storyboards. They also process flows or sitemaps. They'll then use their creativity while applying color palettes based on what best fits into a particular design conceptually. They also ensure that the end-to-end journey with their products or services meets desired outcomes.

- Maintain and improve website
- Optimize applications for maximum speed
- Design mobile-based features
- Collaborate with back-end developers improve usability.
- Test and troubleshoot across multiple browsers, platforms, and devices
- Prepare front-end templates to provide progressive enhancement for modern browsers and graceful degradation for older browsers
